Part-A: From the CEO's Desk

Mr. A Srinivasa Ramanujan
CEO, BIA

Policy Signals, Practical Realities — Why Industry Voice Matters More Than Ever

In recent months, many of us across the industrial ecosystem have sensed a steady increase in policy movement — new guidelines, revised compliance frameworks, evolving taxation approaches, infrastructure regulations, and sector-specific operating norms. For industry, especially MSMEs and mid-sized enterprises, policy is no longer a distant backdrop. It is becoming an active, day-to-day operating factor.

This is not necessarily a negative development. In fact, structured policy environments can create long-term stability and predictability. However, the pace and layering of change can sometimes feel heavy particularly when implementation timelines are tight and ground-level realities vary widely across locations and sectors.

At such times, the role of an industry association becomes especially important — not as a commentator from the sidelines, but as a bridge between policy intent and operational reality. This is where your participation, inputs, and shared experiences make all the difference.

Policy Is Strongest When It Is Informed by Practice

Most policies are framed with good intent — to improve governance, transparency, sustainability, safety, or public revenue systems. Yet, policy design often happens at a macro level, while implementation happens at a micro level — inside factories, offices, shop floors, logistics yards, and industrial layouts.

The distance between these two levels is where practical challenges arise:

- ❖ Interpretation gaps
- ❖ Compliance cost burdens
- ❖ Infrastructure readiness mismatches
- ❖ Transition time constraints
- ❖ Sector-specific operational differences

When policymakers receive structured, evidence-based feedback from industry bodies, they are often far more receptive than we assume. Constructive representation works — especially when it is factual, measured, and solution-oriented.

Our collective experience shows that governments respond better to organized insight than to isolated complaints.

Why Associations Must Speak — Carefully and Credibly

An industry association's voice carries weight only when it reflects its members accurately and responsibly. That requires three things:

- ❖ Ground data
- ❖ Balanced framing
- ❖ Constructive intent

Representation is not about opposing policy. It is about improving policy outcomes through field feedback.

When we present inputs, we aim to:

- ❖ Clarify unintended operational impacts
- ❖ Suggest workable alternatives
- ❖ Request phased implementation where needed
- ❖ Highlight sector diversity
- ❖ Support better compliance through better design

This is a collaborative process — not an adversarial one. Member Inputs: Not Complaints — Contributions.

It is important to emphasize that when members share operational difficulties, cost pressures, or compliance challenges, it should never be viewed as resistance. Instead, it is valuable field intelligence. Every industry operates under unique constraints — scale, workforce patterns, energy usage, supply chain models, export obligations, capital cycles, and customer commitments. What works smoothly for one segment may be disproportionately difficult for another.

When members share their experiences:

- ❖ They help improve collective representation
- ❖ They enable data-backed dialogue
- ❖ They strengthen policy advocacy
- ❖ They support better long-term solutions
- ❖ Participation is not criticism — it is contribution.

The Value of Structured Feedback Over Informal Concern

Informal discussions are useful, but structured submissions are powerful.

When inputs are:

- ❖ Quantified
- ❖ Time-stamped
- ❖ Sector-tagged
- ❖ Location-specific
- ❖ Supported by cost or operational data
 - they become credible representation tools.

Well-structured feedback allows associations to:

- ❖ Identify patterns
- ❖ Separate isolated cases from systemic issues
- ❖ Prioritize representations
- ❖ Engage departments with clarity
- ❖ Track outcomes over time

This makes dialogue with authorities more effective and more respected.

Policy Engagement Is a Two-Way Street

Constructive engagement does not mean asking only for concessions. It also includes:

- ❖ Supporting feasible compliance pathways
- ❖ Sharing best practices across members

- ❖ Promoting responsible industry behaviour
- ❖ Encouraging preparedness
- ❖ Aligning with long-term regulatory direction

When associations demonstrate balance — acknowledging policy goals while explaining practical challenges — engagement quality improves significantly.

Credibility is built not by volume of representation, but by fairness of representation.

A Shared Responsibility Model

The most effective industry ecosystems operate on shared responsibility:

- ❖ Government designs policy
- ❖ Industry implements reality
- ❖ Associations connect the two
- ❖ Each side benefits when the other side is heard clearly.

Our role as an association is to:

- ❖ Listen without judgment
- ❖ Consolidate without distortion
- ❖ Represent without exaggeration
- ❖ Engage without confrontation
- ❖ Follow up without fatigue

And this is only possible when members stay engaged and communicative.

A Continuing Conversation — Not a One-Time Exercise

Policy engagement is not event-based. It is a continuous process. Conditions change, industries evolve, technologies shift, and regulatory priorities adjust. What matters is that the channel of dialogue remains open and credible.

We encourage members to view the association not just as a forum, but as a working platform — one that converts collective insight into constructive influence.

Your inputs — when shared thoughtfully — strengthen everyone's voice.

Closing Note

Our intention is always collaborative: to work with departments, not against them; to support compliance, not avoid it; and to ensure that policy outcomes remain practical, fair, and sustainable for all stakeholders.

Industry grows best when policy and practice walk together.

And that journey is always stronger when we walk it collectively.

Call to Action

Our team will periodically reach out to members for specific operational inputs to support structured representation with authorities. We request your continued cooperation so BIA can present well-grounded submissions and pursue collective resolutions in a timely and compliant manner.

Member Partnership Note:

"BIA is building a structured knowledge base to strengthen our representations with government and utility authorities. Our team may connect with member units from time to time to collect specific operational inputs. We warmly request your support and cooperation in sharing such information when approached. Your participation helps us advocate more effectively and move matters forward faster - within proper and compliant processes — for the benefit of the entire industrial community."

Part-B: Trade, Investment, Economy, Industry & commerce update

1. Budget FY27 prioritises fiscal discipline, infra and Atmanirbharta: Expenditure Secretary V Vualnam

India's Union Budget 2026–27 maintains a strong focus on fiscal prudence, infrastructure expansion, domestic manufacturing and social-sector spending, said Expenditure Secretary V Vualnam. According to Vualnam, the budget framework reflects continued attention to public investment, innovation financing, and sectoral allocations.

Part-C: BIA Activities & Initiatives

Industrial area deweeding & drain cleaning work:

Location	Before	After	Status
Phase -1 (Near JRVD)			Completed
Phase-2 (Meta spark) Fire safety preparedness			Completed
Phase -2 Near (Shyanumangala road)			Completed
Phase -2 (Near Manjushree Techno park road) Fire safety preparedness			Completed
Road Sweeping work (Near Shyanumanagla circle)			Completed

Part -D: Infrastructure Development Activities FY 2025-26

1. Road Shoulder Development in sector-1		
Present Status	Photos	Next Action
❖ 1300/1600 m (81%) shoulder paving work completed, sector-1 entrance to Ratnagiri (one side). ❖ Sector-1 to NV weigh bridge completed. NV weigh bridge to diamond bucket (other side) in progress.		Completion of +200 Mtrs by 20 th Feb'26.
2. Dedicated fire station department		
30% of land levelling work completed, remaining is in progress.		50% completion of land levelling work by 19 th Feb'26.

Road Accident Summary:

<our goal is Zero Accident on our roads>

Glimpses of Awareness session on Analysis of Union Budget 2026

Session Title: Analysis of Union Budget 2026

Date: 5th February 2026 (Friday)

Participated: 70 participants

Speakers: CA. D Ramprasad, CA. Ashwath Pai and CA. Shraddha Bagadi from M/s Baker Tilly ASA India

The purpose of this session was to help participants:

- ❖ Understand the major highlights of Union Budget 2026.
- ❖ Interpret taxation changes and regulatory updates.
- ❖ Assess the impact on industry, corporates, and MSMEs.
- ❖ Identify financial, compliance, and strategic implications.
- ❖ Prepare organizations for upcoming policy and cost change.

Member Engagement Program

M/s Giliyal Industries

M/s Manjushree SPNTEK Pvt. Ltd.

BIA has a Member Engagement Program to meet each and every industry member, in order to have a one-on-one interaction with the top managements of each industry. This is being done to exchange information that will be mutually valuable, for a deeper understanding of each member industry operations & challenges, from top management perspective, as well as to update to the top managements about BIA activities. This will be a continuous engagement through the year, so that all the members are covered individually. Above are glimpses of meetings held last week.

Environment noncompliance from few members
